## JULY HIGHLIGHT

This July, we provided over 100 lunches to My Friend's Place. My Friend's Place is a non-profit organization that has helped support and provide for the homeless youth of Los Angeles for over 30 years. Our staff worked together to decorate bags with positive messages, spread peanut butter and jelly, and package over 100 lunches. We know that many young people right now have limited access to regular, free meals, so we decided to take action and reach out to My Friend's Place to see how we could help! It was a wonderful experience for all of us, and upon delivery our lunches were immediately handed out to those waiting for their next meal.

# HOW TO CHOOSE YOUR EV CHARGER

There are as many types of electric vehicles as there are types of chargers. Finding the right charger for you will mean determining what your vehicle needs, as well as what your existing electrical system can handle. Electric vehicle chargers are broken up into three main categories:

**Level 1 Charger:** This simple unit is usually included with the purchase of your electric vehicle, and plugs into a standard 120-volt outlet. This is a good option for those who do not spend much time driving their EV.

**Level 2 Charger:** This unit allows for much faster charging, with vehicles reaching a full charge in 4-6 hours. They require 240-volts to operate.

**Level 3 Charger:** The top tier of electric vehicle chargers will have your electric vehicle battery charged in record time - 30 minutes to an hour! They are the perfect fit for businesses that need to keep their electric vehicles operable throughout the day.

No matter what you end up choosing, our team will be there with you every step of the way.

## MEET AN ELECTRICIAN

Matt started at Southwest as an electrician and after a few years, and a lot of experience gained, he became a Tech Estimator. His electrical knowledge set him up perfectly for his role. We have been thrilled to watch Matt help customers with all their estimate needs.

---

## WHAT DO YOU ENJOY MOST ABOUT YOUR JOB?

*"I love the vibe at Southwest. Everyone has a good attitude and is willing to help out in whatever aspect necessary. I also love learning every day and growing in my newer position as a Tech Estimator." - Matt Akin*

---

## TESTIMONIALS FROM OUR RECENT WORK

"Excellent service. It would be impossible to improve anything- Doug was on time, friendly, and took care of the problem. Will be calling if anything comes up." -Mike

"Bruce did a great job in a timely manner. Was patient while we were working around him. Clean and thorough. He has been in our facility before and understands our safety prerequisites. Provided his personal Covid19 protection while on site." -Guillermo

"It was just what I would expect from a good contractor. I didn't have to go out, give input or micromanage onsite, which means it was a great job. Service was clear, efficient from start to finish and work was as expected!"

-David

" The service was great, as always, started and completed as quick as can be. It's why we come back to you guys time and time again. Thanks!" -Morgan
